Notes - 9/12

Wednesday, September 12, 2012   1:02 PM

[In 41/5731 at 1:00 today.]

Agenda:
- {} and IMap interfaces (from [Monaco](#))
  - This is by design
    - You have the capability, but it's not a member
    - Question: Should {} be 'any'
    - Not sure how to make this work without breaking something
    - Out of time to try and change this now
    - Option?
      - If there is an ambiguity, but there is a best common type, choose that, else error as before
    - Let's go with the option above if it doesn't break anything
- Confirm 'instanceof' plan
  - Add constructors to DOM

- Overloads feedback (from TFS and others)
  - Not doing anything for now
  - Could consider more errors here in the nearer term
  - Want to do more in the future

- Function.prototype.bind/call
  - Want to do in the future

By tomorrow - we will have a working nightly build from now till forever.

Bugs:
1. Battleship should reference jquery and jqueryui

- Others? Issues blocking M8 work?
