Notes - 7/8: SENT

Thursday, July 21, 2011   8:56 PM

Topics:
- Array literals
- Object literals

Current:
- Object literals are 'any'
- Array literals are
- Multiple returns are first lexical return

Discussion of Open types ideas
- Ultimately devolves to symbolic execution

Decision: Remove the old function syntax – unify on interface syntax

Siganture Matching:

{ substring(number, number): string; substring(number): string }
An implementation is required to offer at least: { substring(number, number): string }

Varargs means an infinite number of
